Summary

Computer Science undergraduate with hands-on experience in full-stack development, AI automation, and startup environments. Experienced in building responsive web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and REST APIs. Actively studying AI engineering concepts including Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), embeddings, vector databases, semantic search, and AI agents. Also experienced in content strategy, creator marketing, influencer outreach, and social media growth. Interested in building practical AI-powered applications and intelligent automation solutions.

Experience

AI/Automation Intern October 12, 2026 – Present
Solution Bowl *India*

- Contributing to AI automation and digital product initiatives, exploring technology-driven solutions to real-world business problems
- Studying and researching AI engineering concepts including Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), embeddings, vector databases, semantic search, and AI agents
- Exploring LLM application development, prompt engineering, context management, and techniques for building intelligent AI-powered workflows
- Researching AI automation architectures, API integrations, and tools for connecting AI capabilities with practical business workflows
- Working on portfolio and website development initiatives using Next.js, Tailwind CSS, Three.js, and GSAP to create interactive digital experiences
- Exploring 3D interactions, animations, and visual storytelling to communicate AI-driven services and technology solutions

Social Media Intern 2026 – Present
BLEP Pet Food *Delhi NCR, India*

- Managed social media initiatives for a growing pet food brand, contributing to content strategy, campaign execution, and audience engagement
- Developed Instagram Reel ideas, scripts, storytelling concepts, and creator-led content aligned with brand positioning
- Researched and approached pet creators and influencers by evaluating audience relevance, engagement, content quality, and campaign fit
- Handled creator communication and collaboration negotiations including deliverables, barter collaborations, timelines, briefs, and content approvals
- Coordinated creator campaigns from initial outreach through content delivery, publishing, and performance tracking
- Analyzed content performance including views, engagement, hooks, and audience response to improve future content strategies
- Supported community-building and brand awareness initiatives by engaging with pet parents and identifying relevant creator opportunities
- Represented BLEP at the India International Pet Trade Fair (IIPTF), interacting with pet-industry businesses and professionals

Content & Social Media Intern May 2026 – Present
Skillsnap Learning *On-site, India*

- Contributed to educational and creator-led video content for Instagram, YouTube, and social media campaigns
- Assisted in content ideation, scripting, research, recording support, and execution of short-form educational content
- Collaborated on content initiatives that generated 13K+ views through strategic planning and audience-focused storytelling
- Researched AI, web development, creator trends, and social media strategies to support content planning
- Managed content trackers, publishing workflows, spreadsheets, and operational documentation

- Prepared content briefs, reports, updates, and structured documentation for internal planning and execution
- Worked closely with startup leadership and team members on growth initiatives and content operations
- Utilized analytics, AI tools, and performance tracking to improve content effectiveness and audience engagement

Full Stack Intern January 2026 – Present
Websitele *Remote, India*

- Converted 10+ Figma designs into responsive, pixel-accurate interfaces using React.js, Next.js, Tailwind CSS, HTML, and CSS
- Integrated REST APIs with asynchronous data handling, error boundaries, loading states, and optimized frontend workflows
- Built reusable UI components and scalable frontend architecture across multiple pages and application workflows
- Worked with backend APIs, authentication workflows, CRUD operations, and database-connected frontend systems
- Developed onboarding workflows and production-ready interfaces with focus on usability, responsiveness, and maintainability

Projects

StackWise – React.js, Next.js, Node.js, MongoDB Live Demo

- Built a SaaS-style AI spend optimization platform helping startups identify redundant AI subscriptions and reduce operational costs
- Developed audit workflows, dashboard analytics, AI-based recommendations, and lead capture flows
- Implemented full-stack workflows using React.js, Next.js, Node.js, Express.js, and MongoDB
- Designed scalable frontend architecture with reusable components and user-focused product workflows

MealMind – AI Meal Planner – React.js, Node.js, Express.js, MongoDB Live Demo

- Built an AI-powered nutrition planning platform generating personalized meal plans based on user preferences, budget, and fitness goals
- Designed budget-aware meal optimization logic and responsive full-stack architecture using the MERN stack
- Integrated AI-generated nutrition insights and personalized workflows to improve the user experience

Food Product Explorer – React.js, Vite, REST API Live Demo

- Built a food discovery platform using the OpenFoodFacts REST API with search, filtering, product exploration, and optimized rendering
- Implemented API integration and responsive React components for efficient product discovery and browsing

Elementum Website – React.js, Tailwind CSS Live Demo

- Developed a responsive modern website from design concepts using React.js and Tailwind CSS
- Built reusable UI components with focus on responsive layouts, clean architecture, and optimized frontend performance

Education

KR Mangalam University 2023 – 2027
Bachelor of Technology, Computer Science and Engineering *Delhi NCR, India*

Skills

AI & AI Engineering: LLMs, RAG, Prompt Engineering, Embeddings, Vector Databases, Semantic Search, AI Agents, AI Automation

Frontend: React.js, Next.js, JavaScript, HTML, CSS, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, MongoDB, REST APIs, CRUD Operations, Authentication

Development Tools: Git, GitHub, Vercel, Postman, VS Code, Figma

Social Media: Instagram Reels, YouTube Shorts, Content Planning, Trend Research, Audience Engagement, Community Building

Creator Marketing: Influencer Outreach, Creator Research, Collaboration Negotiation, Barter Campaigns, Campaign Coordination

Content Creation: Script Writing, Storytelling, Video Recording, Video Editing, Educational Content, Personal Branding

Marketing & Growth: Content Strategy, Social Media Analytics, Audience Insights, Brand Awareness, Creator Economy
Tools: Canva, Notion, Google Sheets, Microsoft Excel, Google Docs, OBS Studio, CapCut, AI Tools
Problem Solving: Data Structures & Algorithms, Arrays, Strings, Two Pointers, Hashing
Communication: Public Speaking, Technical Writing, Research, Presentation Skills, Team Collaboration
